

EAST SUSSEX CARPENTRY LTD *Heritage Joinery • Local Craftsmanship • Considered Design*

ABOUT OUR WORK

East Sussex Carpentry Ltd is a well-established local business recognised for its heritage restorative joinery and traditional woodworking values. Our board ranges are created with the same attention to detail, careful hardwood selection and respect for natural materials that define our restoration work. Each piece is shaped, finished and oiled by hand, resulting in a board that balances durability with refined, elegant design.

CARE & MAINTENANCE

Hand-wash only Clean with warm, soapy water and dry immediately. Do not soak or place in a dishwasher.

Keep dry between uses Store upright or on a rack to allow airflow around the board.

Oil regularly Apply a food-safe mineral oil or board conditioner whenever the surface appears dry.

Use both sides Rotating the board promotes even wear and reduces the likelihood of cupping.

Natural patina Knife marks, tonal changes and gentle wear are expected and contribute to the board's character.

NATURAL VARIATION

Every board is crafted from real hardwood, and no two pieces will ever be identical. Variations in colour, grain, figure and texture are inherent to natural timber. Subtle dimensional differences may occur due to hand-finishing and seasonal movement. Mixed-species boards (MX2, MX3, MX4) vary depending on hardwood availability, but all follow the same standards of quality and craftsmanship.

IMPORTANT NOTES

- Dimensions are approximate
- Colour may deepen naturally over time
- Finished with food-safe oils
- Not dishwasher safe
- Natural movement is normal with real timber

Crafted in East Sussex using carefully selected hardwoods
